

Sumit Kumar Patel

AI Automation Engineer & AI/ML Engineer

📍 Indore, MP, India +91-7224825162 | # sumitkumarpatel01122005@gmail.com | [Linkedin](#) | [Github](#) | [Leet code](#)

Professional Summary

Aspiring **AI Automation and AI Engineer** with a strong foundation in Data Structures, Algorithms, and programming. Currently learning AI/ML and experienced in building machine learning projects through a **one-month internship** at **Edu-net**. Completed **n8n automation** workflows and actively involved in AI/ML-based projects, including participation in national-level hackathons such as ISRO Hackathon, and fourth runner up in SIH internal hackathon. Skilled in developing scalable applications with a focus on problem-solving, **automation**, and real-world impact.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering Sep. 2023 – Present
University Institute of Technology, RGPV, Shivpuri (M.P.)
CGPA: 7.74/10
Expected Graduation: 2027

Coursework:

- Operating Systems, Data Structures & Algorithms,
- Analysis & Design of Algorithms, Database Management Systems

Skills & Knowledge

- Programming Languages:** Python, C++, Kotlin, SQL, HTML, CSS, JavaScript, React, Next.js
- Core Subjects:** Data Structures & Algorithms, Operating Systems, DBMS
- AI/ML:** Pandas, NumPy, Seaborn, Matplotlib, Plotly, Scikit-learn (Basic), AI Model Design, PyTorch, MLOps ,Machine Learning, Deep Learning, NLP, REST API, TensorFlow, FastAPI, LangChain, LLM, Generative AI, Docker Deployment, Vector Database, RAG.
- Tools & Technologies:** Git, GitHub, VS Code, Tailwind CSS, Pinecone, Versal, Netlify, Slack, Airtable
- Designing:** Canva, Miro, Figma
- Ai Automation tools:** n8n, Make
- Other:** Problem Solving, Debugging, Model Deployment, Feature Engineering

Experience

- Hackathon Participant – ISRO Hackathon** Aug. 2025 - Sep. 2025
- Working on real-world problem statements involving AI/ML and satellite data
 - Collaborated in a team environment to design scalable solutions
- ML Intern - Edunet Foundation** Dec. 2024 - Jan. 2025
- Built and trained a CNN-based deep learning model achieving 95% accuracy on 150K+ plant disease images using TensorFlow and Python.

Projects

- Air Pollution Monitoring System (ISRO Hackathon)**
- Developed system for pollution monitoring using satellite & ground data
 - Tech: Python, Data Analysis
- Healy Mate – Mental Wellness Web App**
- Built full-stack app with AI-based sentiment analysis
 - Tech: Next.js, AI
- Plant Disease Detection System**
- Developed CNN model for plant disease classification (95% accuracy)
 - Tech: Python, TensorFlow, NumPy, Pandas ,Kaggle Datasets
- Automation Workflow Projects**
- Built RAG Agent, Resume Simplifier, Auto Mail Sender, Data Simplifier
 - Tech: n8n, APIs, Pinecone, Automation Tools

Certifications

- Tata - Gen AI Powered Data Analytic Job Simulation
- Postman API Fundamentals Student Expert
- Coursera - Google Data Analytics Capstone: Complete a case study
- HP Life - AI For Beginners
- Intel - AI For Entrepreneurship
- Infosys- Complete AI/ML Course For Beginners
- LetsUpgrade - Build Your Own AI Document Assistant

Achievements

- Selected participant in **ISRO** Hackathon
- 4th** Runner-up in **SIH** Internal Hackathon
- Developed multiple real-world projects in **AI/ML** and Web Development

Extra-Curricular

- Involved in organizing and managing technical events and hackathons as a Coordinator.
- Contributed to team coordination, promotions, and execution of coding events.
